

This workshop aims to present the operation of the BIOWAVE (PELCO) instrument, dedicated to the rapid preparation of biological samples.

Participants will discover the principles of microwave-assisted processing for embedding in Epon resin.

A practical demonstration of an OTO protocol will be carried out during the workshop (1 hour 30 minutes).

Samples brought by participants may be processed during the session (please specify your sample type in advance).

Resin blocks will be sent to participants after the workshop.
